

Your team's AI learning journey

A complete, security-first route from first steps to leading AI change. Everyone starts with the AI Licence. Once it is complete, every track opens and the four stages follow at each person's own pace, with a badge for every milestone. Available in any language, including Arabic and all major European languages.

17 courses

102 5 to 7 minute
interactive lessons

10 hours of learning,
approximately

300+ practice
activities

70+ worked prompt
examples

Licence first

Everyone earns the AI Licence, renewed every year. Once it is complete, the journey and every track open.

Colleague stories

Each lesson follows a colleague at Kestrel Hart, a fictional UK facilities company, through a real work situation, then the learner practises.

Learn by doing

Scenario questions, sorting tasks and spot the issue, worked prompt examples, and an end-of-course check at 80%.

Security throughout

A security checkpoint in every stage, plus a full IT and Security track included for everyone.

From the AI Licence to AI Champion

The spine of the Academy, about 4 hours 15 minutes in all. Start with the AI Licence, then climb Stages 1 to 4 at your own pace, each stage unlocking the next.

REQUIRED

AI Licence

8 lessons · about 55 min

Badge: AI Licence

Before you use AI at work, earn your AI Licence.

- 1 Why safe AI matters
- 2 The traffic light rule
- 3 Approved tools and shadow AI
- 4 Personal data and UK GDPR
- 5 Confidentiality, IP and copyright
- 6 Trust, but verify
- 7 AI-powered scams
- 8 Our AI rules and reporting

Licence check: 10 questions, 80% to pass

STAGE 1

Explorer

8 lessons · about 50 min

Badge: Explorer

Your first steps with AI at work.

- 3 Risk appetite and governance
- 4 Leading people through AI change
- 5 Questions boards should ask

Leaders track check: 5 questions, 80% to pass

Need a track for your sector?

We build custom courses around your own processes, tools and policies, delivered in the same Academy alongside the core journey.

TECHNICAL TRACK · INCLUDED FOR EVERYONE

IT and Security: Securing AI in Your Organisation

For IT, security and data protection teams. Opens once the AI Licence is complete.

TECHNICAL TRACK

IT and Security

10 lessons · about an hour

Badge: AI Security Guardian

A technical track for IT, security and data protection teams.

- | | |
|----------------------------------|--|
| 1 How AI systems work | 6 Prompt injection and data exfiltration |
| 2 Choosing AI vendors safely | 7 Securing agents and connectors |
| 3 Setting up enterprise AI | 8 DPIAs and UK GDPR for AI |
| 4 Finding and managing shadow AI | 9 Monitoring and incident response |
| 5 The AI threat landscape | 10 Frameworks and standards |

IT and Security check: 10 questions, 80% to pass

Getting started

- Your own company space on the Capytech LMS, with your branding, managers and reporting
- Every learner starts with the AI Licence, then the journey and every track open, to follow at their own pace
- Works on desktop, tablet and phone, with keyboard and screen reader support, in any language
- Progress, badges and skills for every learner, team and department
- Optional add-ons: your own AI policy built into the Licence, custom courses, and a fully branded LMS of your own
